

**Claims**

**Claims 1-24 (Cancelled)**

**Claim 25 (Previously presented):** In combination with a cabinet and door, a hinge for pivotally connecting the door to the cabinet, comprising:  
a door leaf mounted and fully enclosed within the door;  
a cabinet leaf mounted on the cabinet;  
an intermediate leaf interconnecting the door and cabinet leaves; and  
means for controlling the order of operation of the leaves.

**Claim 26 (Original):** The hinge of claim 25 further comprising a first pin to connect the door leaf and intermediate leaf and a second pin to connect the cabinet leaf and intermediate leaf.

**Claim 27 (Original):** The hinge of claim 26 wherein the means provides greater torsional resistance between the cabinet leaf and intermediate leaf than between the door leaf and intermediate leaf when closing the door.

**Claim 28 (Original):** The hinge of claim 26 wherein the means includes a cam ramp on at least one of the cabinets leaf and intermediate leaf.

**Claims 29-32 (Cancelled)**
